

You're Invited

Join authors Gary Stager & Sylvia Martinez for
the Melbourne book launch of

*Invent To Learn - Making, Tinkering,
and Engineering in the Classroom*

14 June 2013

4:30 PM

Spensley Street Primary School

193 Spensley St Clifton Hill VIC 3068

A limited number of books will be available for purchase and signing

“Learning is often confused with education. Martinez and Stager clearly describe ‘learning learning’ through engagement, design and building. The best way to understand circles is to reinvent the wheel.”

- *Nicholas Negroponte, Founder MIT Media Lab & One Laptop Per Child*

“Rarely does an education book come along that provides a cogent philosophical basis and an understanding of learning, thinking and teaching, as well as providing practical guidance for setting up effective digital-age learning and "making" environments.”

- *Holly Jobe, President, International Society for Technology in Education*

“Thank you Gary and Sylvia. Your fresh, lively and fascinating book can help us to reinvent schooling by making it relevant. Too many educators are closing student minds, chasing scores, following prescriptive curriculum. There is another way and this book will help all who want to see engaged students, support for creativity and ‘making’ and even a historical and philosophical context for thinking differently.”

- *David Loader OAM, Author of The Inner Principal, Associate Professor and Principal Fellow – Melbourne Graduate School of Education, Melbourne University*

“Here is a book that encourages everyone to be a learner, doer and maker of things that intrigue them. A challenge is now put to everyone, but especially teachers, to make learning a personal journey for each of their students. The challenge is to trust in children, and allow them to create, fail, share, succeed and understand in a manner that will endure.”

- *Stephen Costa, Deputy Head of Junior School, Methodist Ladies’ College*
